

VeraCAD Technology Chat**Title: Problem with automatic check for updates****Type: Information****Version: VeraCAD 4.0****Language: English****Date: 14.8.2018**

VeraCAD 4.0 - Internet connection

We tried to realize a mechanism that automatically checks for updates when VeraCAD is launched.

The idea was to check if ERATZ-homepage can be accessed and if yes, to check for updates.

If no Internet is available give a message: "No Internet".

If Internet is available Message: "a new Version is available" or "You are using the latest Version"

For some reason if not Internet is available the program crashes.

We have solved the problem and the proper operation will be in B17 and further.
